**Profile**

QA Engineer

Junior QA Engineer with hands-on experience gained through internship projects and real-world testing tasks. Proficient in manual testing of web applications, including functional, UI/UX, and regression testing. Skilled in frontend test automation using Selenium and Selenide with Java, as well as API testing via Postman. Confident in using Git for version control and Docker Compose for test environment setup. Focused on delivering clear, maintainable test cases and collaborating effectively within development teams.
